

# European Journal of PROTISTOLOGY

## Aims & Scope

Articles deal with protists, unicellular organisms encountered free-living in various habitats or as parasites or used in basic research or applications. The European Journal of Protistology covers topics such as the structure and systematics of protists, their development, ecology, molecular biology and physiology. Beside publishing original articles the journal offers a forum for announcing scientific meetings. Reviews of recently published books are included as well. With its diversity of topics, the European Journal of Protistology is an essential source of information for every active protistologist and for biologists of various fields.

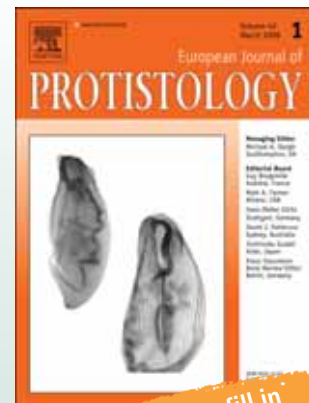

## Abstracted/Indexed in

Abstracts on Hygiene and Communicable Diseases  
Biological Abstracts  
BIOSIS  
Cambridge Scientific Abstracts (CSA)/  
Microbiology Abstracts Section C  
Chemical Abstracts  
Current Advances in Ecological and Environmental Sciences  
Current Contents/Agriculture, Biology & Environmental Sciences  
Deep Sea Research & Oceanographic Abstracts  
Elsevier BIOBASE/Current Awareness in Biological Sciences  
Helminthological Abstracts  
Index Veterinarius  
NISC - National Information Services Corporation  
Protozoological Abstracts  
Selected Water Resources Abstracts  
Science Citation Index  
Scisearch  
Scopus  
Soils & Fertilizers  
Tropical Diseases Bulletin  
Veterinary Bulletin

## Audience

Zoologists, biologists, botanists, algologists, hydrobiologists, protistologists, microbiologists, cytologists, biochemists, geneticists, ecologists, parasitologists, environmental biologists, biotechnologists
